SUBSCRIPTION INFORMATION

Prices: Annual subscription (including annual and monthly) issues) (75¢ additional for foreign mailing)..... $1.50
Monthly issues, each..... 0.15

Subscriptions to these reports should be placed directly with the Department of Commerce Field Offices or with the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C.

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse),merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedual A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

CHANGES IN THE IMPORT STATISTICS AS A RESULT OF PROCESSING THE IMPORT DATA ON ELECTRONIC EQUIPMENT EFFECTIVE WITH MARCH 1958 STATISTICS

Effective with March 1958 data, the import statistics are being tabulated on the Bureau's electronic equipment. This equipment has already been used for the tabulation of the export statistics and the import and export vessel statistics, and is being used for the first time on the import statistics for the March data. In using the electronic equipment for the import statistics, some procedural changes were involved which will affect the timing, appearance, and monthly coverage of the statistics. The principle changes involved are described here.

RELEASE DATES EXPECTED TO BE EARLIER

It is anticipated that after the program becomes established it will be possible to release the basic import tabulations and the FT 950-I at an earlier date. In addition, the high speed printer used in connection with the electronic computer will shorten the time required to prepare the FT 120 for printing after the basic tabulations are run with the result that this report will also be released at an earlier date.

CHANGES IN APPEARANCE AND CONTENT OF REPORTS

The appearance of Report FT 120 prepared by the high speed printer will be changed and will be in four-column arrangement, rather than the previous three-column arrangement, with the page turned horizontally.

TOTAL MONTHLY CARRY-OVER WILL BE INCREASED, AFFECTING COMPARISON OF MARCH TOTALS WITH TOTALS FOR OTHER MONTHS

In order to take full advantage of the possibilities for early release dates with electronic equipment, procedures were instituted with the March statistics which will have the effect of carrying over to succeeding months' statistics a larger proportion of the import shipments made during the current month. For technical reasons, about $80 million of imports for consumption (roughly 8 percent of total imports for consumption) which under past procedures would have been included in the March FT 120, will be carried over into the FT 120 for April. With these new procedures in effect on a continuing basis, it is expected that the resulting increase in April statistics will be compensated for by April shipments which will be carried over into May. The coverage for Report FT 120 for May and subsequent months will then be comparable to April. The over-all general import total announced in the FT 950-I includes about $75 million carry-over in general imports (about 7 percent of total general imports) in order that this total for March would be comparable to similar monthly totals announced in the FT 950-I. The data presented in Report FT 120 are undercounted to the extent that the $80 million carry-over in imports for consumption is not included.

A similar increase in carry-over (although smaller as a percentage of the total) took place in the export statistics when electronic equipment was introduced in the compiling of export data. (See Foreign Trade Statistics Notes April 1955, June 1955 and March 1957.)

RELIABILITY OF MONTH-TO-MONTH COMPARISONS FOR SMALLER SEGMENTS OF TRADE MAY BE DECREASED BY ADDED CARRY-OVER

The compensating effect which will keep the over-all totals at approximately the current level in spite of the month-to-month carry-over, cannot be expected to exist to as large an extent in total for smaller segments of the trade. However, it is expected that in the country, country by group, and country by subgroup totals there will be some tendency (after March) for the shipments omitted from the current month to be compensated for by similar shipments carried over from the preceding month, but for countries where the volume of trade is not large, month-to-month comparison should be made in awareness of the possibility that the figures for a given month may represent more than, or less than, the amounts imported during the month. This caution has always been necessary. The new procedures increase the need for it.

Some indication of the probable carry-over from month-to-month based on the March carry-over, is presented in the March 1958 issue of this report in terms of country totals. Additional information on the month-to-month carry-over may be obtained by writing to the Bureau of the Census, Washington 25, D. C. It may be necessary to charge for furnishing this information depending upon the type and amount of information requested.

EXPLANATION OF THE SAMPLING PROCEDURE FOR ESTIMATING LOW VALUED IMPORTS, 1958

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99, includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 99. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups 10, "Leather, rawhide and parchment manufactures;" subgroup 15, "Fodders and feeds, n.e.s.;" subgroup 86, "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and subgroup 90, "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 99. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 99. For subgroup 99, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 99.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 99 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 99 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Formal entry $1 to $99, and informal entry $1 to $250 shipments" (not shown in this report but published in FT 970-I)
3. Arbitrary commodity subgroup code 99 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 99 based upon 75 shipments in the sample would be between $15,855,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percnet document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparision with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 99. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175 199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1]The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2]If the number of documents in the sample is greater than 499, the sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

[The commodity group and subgroup figures shown in this table are not comparable with figures for periods prior to 1958 because of certain changes in sampling procedures and presentation for low value shipments. For an explanation of the change in sampling and presentation see explanation of the sampling procedure for estimating low valued imports, 1958 on page 5 of this report]

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 120, February, 1959. Washington 25, D. C. April, 1959.

For sale by the Superintendent of Documents, U. S. Government Printing Office and Bureau of the Census, Washington 25, D. C. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for Foreign Mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Hawaii and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for instransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countires reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99, includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 99. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups 10, "Leather, rawhide and parchment manufactures;" subgroup 15, "Fodders and feeds, n.e.s.;" subgroup 86, "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and subgroup 90, "Books, maps, pcitures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 99. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 99. For subgroup 99, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 99.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 99 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 99 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Formal entry $1 to $99, and informal entry $1 to $250 shipments" (not shown in this report but published in FT 970-I)
3. Arbitrary commodity subgroup code 99 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 99 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 99. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1]The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2]If the number of documents in the sample is greater than 499, the sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

[The commodity group and subgroup figures shown in this table are not comparable with figures for periods prior to 1958 because of certain changes in sampling procedures and presentation for low value shipments. For an explanation of the change in sampling and presentation see explanation of the sampling procedure for estimating low valued imports, 1958 on page 5 of this report]

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 120, March, 1959. Washington 25, D. C. May, 1959.

For sale by the Superintendent of Documents, U. S. Government Printing Office and Bureau of the Census, Washington 25, D. C. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for Foreign Mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Hawaii and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for instransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countires reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99, includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 99. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups 10, "Leather, rawhide and parchment manufactures;" subgroup 15, "Fodders and feeds, n.e.s.;" subgroup 86, "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and subgroup 90, "Books, maps, pcitures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 99. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 99. For subgroup 99, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 99.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 99 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 99 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Formal entry $1 to $99, and informal entry $1 to $250 shipments" (not shown in this report but published in FT 970-I)
3. Arbitrary commodity subgroup code 99 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 99 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 99. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320

19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1]The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2]If the number of documents in the sample is greater than 499, the sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

[The commodity group and subgroup figures shown in this table are not comparable with figures for periods prior to 1958 because of certain changes in sampling procedures and presentation for low value shipments. For an explanation of the change in sampling and presentation see explanation of the sampling procedure for estimating low valued imports, 1958 on page 5 of this report]

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

The WTIS is a three-part series of reports, issued by the Bureau of Foreign Commerce, each report covering a specific subject in one country or area. Part 1 includes economic and marketing data; Part 2, details needed in handling day-to-day export and import operations; and Part 3, International Trade Statistics for market research, including U. S. foreign trade summaries based on data compiled by the Bureau of the Census.

Subscriptions may be placed with Department of Commerce Field Offices or with the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. Remittances should be made payable to the Superintendent of Documents.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 120, April, 1959. Washington 25, D. C. June, 1959.

For sale by the Superintendent of Documents, U. S. Government Printing Office and Bureau of the Census, Washington 25, D. C. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for Foreign Mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Hawaii and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for instransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countires reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99, includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 99. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups 10, "Leather, rawhide and parchment manufactures;" subgroup 15, "Fodders and feeds, n.e.s.;" subgroup 86, "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and subgroup 90, "Books, maps, pcitures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 99. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 99. For subgroup 99, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 99.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 99 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 99 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Formal entry $1 to $99, and informal entry $1 to $250 shipments" (not shown in this report but published in FT 970-I)
3. Arbitrary commodity subgroup code 99 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 99 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 99. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1]The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2]If the number of documents in the sample is greater than 499, the sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

[The commodity group and subgroup figures shown in this table are not comparable with figures for periods prior to 1958 because of certain changes in sampling procedures and presentation for low value shipments. For an explanation of the change in sampling and presentation see explanation of the sampling procedure for estimating low valued imports, 1958 on page 5 of this report]

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 120, May, 1959. Washington 25, D. C. July, 1959.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for Foreign Mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Hawaii and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for instransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

UNIVERSITY OF ILLINOIS
AUG 21 1975
LIBRARY

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countires reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

EXPLANATION OF THE SAMPLING PROCEDURE FOR ESTIMATING LOW VALUED IMPORTS, 1959

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99, includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 99. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups 10, "Leather, rawhide and parchment manufactures;" subgroup 15, "Fodders and feeds, n.e.s.;" subgroup 86, "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and subgroup 90, "Books, maps, pcitures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 99. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 99. For subgroup 99, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 99.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 99 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 99 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Formal entry $1 to $99, and informal entry $1 to $250 shipments" (not shown in this report but published in FT 970-I)
3. Arbitrary commodity subgroup code 99 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 99 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 99. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1]The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2]If the number of documents in the sample is greater than 499, the sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

[The commodity group and subgroup figures shown in this table are not comparable with figures for periods prior to 1958 because of certain changes in sampling procedures and presentation for low value shipments. For an explanation of the change in sampling and presentation see explanation of the sampling procedure for estimating low valued imports, 1958 on page 5 of this report]

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 120, June, 1959. Washington 25, D. C. August, 1959.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for Foreign Mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Hawaii and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for instransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countires reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

EXPLANATION OF THE SAMPLING PROCEDURE FOR ESTIMATING LOW VALUED IMPORTS, 1959

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99, includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 99. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups 10, "Leather, rawhide and parchment manufactures;" subgroup 15, "Fodders and feeds, n.e.s.;" subgroup 86, "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and subgroup 90, "Books, maps, pcitures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 99. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 99. For subgroup 99, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 99.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 99 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 99 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Formal entry $1 to $99, and informal entry $1 to $250 shipments" (not shown in this report but published in FT 970-I)
3. Arbitrary commodity subgroup code 99 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 99 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 99. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320

13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1]The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2]If the number of documents in the sample is greater than 499, the sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

[The commodity group and subgroup figures shown in this table are not comparable with figures for periods prior to 1958 because of certain changes in sampling procedures and presentation for low value shipments. For an explanation of the change in sampling and presentation see explanation of the sampling procedure for estimating low valued imports, 1958 on page 5 of this report]

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 120, July, 1959. Washington 25, D. C. September, 1959.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for Foreign Mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Hawaii and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for instransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countires reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99, includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 99. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups 10, "Leather, rawhide and parchment manufactures;" subgroup 15, "Fodders and feeds, n.e.s.;" subgroup 86, "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and subgroup 90, "Books, maps, pcitures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 99. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 99. For subgroup 99, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 99.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 99 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 99 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Formal entry $1 to $99, and informal entry $1 to $250 shipments" (not shown in this report but published in FT 970-I)
3. Arbitrary commodity subgroup code 99 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 99 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 99. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240

175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1]The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2]If the number of documents in the sample is greater than 499, the sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

[The commodity group and subgroup figures shown in this table are not comparable with figures for periods prior to 1958 because of certain changes in sampling procedures and presentation for low value shipments. For an explanation of the change in sampling and presentation see explanation of the sampling procedure for estimating low valued imports, 1958 on page 5 of this report]

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 120, August, 1959. Washington 25, D. C. October, 1959.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for Foreign Mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Hawaii and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for instransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countires reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

EXPLANATION OF THE SAMPLING PROCEDURE FOR ESTIMATING LOW VALUED IMPORTS, 1959

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.

   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99, includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 99. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups 10, "Leather, rawhide and parchment manufactures;" subgroup 15, "Fodders and feeds, n.e.s.;" subgroup 86, "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and subgroup 90, "Books, maps, pcitures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.

   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 99. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 99. For subgroup 99, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 99.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 99 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 99 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Formal entry $1 to $99, and informal entry $1 to $250 shipments" (not shown in this report but published in FT 970-I)
3. Arbitrary commodity subgroup code 99 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 99 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 99. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by

200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1]The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2]If the number of documents in the sample is greater than 499, the sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

[The commodity group and subgroup figures shown in this table are not comparable with figures for periods prior to 1958 because of certain changes in sampling procedures and presentation for low value shipments. For an explanation of the change in sampling and presentation see explanation of the sampling procedure for estimating low valued imports, 1958 on page 5 of this report]

Sub-group code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Value (dollars)

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 120, September, 1959. Washington 25, D. C. November, 1959.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for Foreign Mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Hawaii and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for instransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countires reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99, includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 99. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups 10, "Leather, rawhide and parchment manufactures;" subgroup 15, "Fodders and feeds, n.e.s.;" subgroup 86, "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and subgroup 90, "Books, maps, pcitures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 99. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 99. For subgroup 99, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 99.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 99 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 99 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Formal entry $1 to $99, and informal entry $1 to $250 shipments" (not shown in this report but published in FT 970-I)
3. Arbitrary commodity subgroup code 99 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 99 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 99. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1]The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2]If the number of documents in the sample is greater than 499, the sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

[The commodity group and subgroup figures shown in this table are not comparable with figures for periods prior to 1958 because of certain changes in sampling procedures and presentation for low value shipments. For an explanation of the change in sampling and presentation see explanation of the sampling procedure for estimating low valued imports, 1958 on page 5 of this report]

Subgroup code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Value (dollars)

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 120. October, 1959. Washington 25, D. C. December, 1959.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for Foreign Mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Hawaii and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for instransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countires reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99, includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 99. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups 10, "Leather, rawhide and parchment manufactures;" subgroup 15, "Fodders and feeds, n.e.s.;" subgroup 86, "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and subgroup 90, "Books, maps, pcitures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 99. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 99. For subgroup 99, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 99.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 99 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 99 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Formal entry $1 to $99, and informal entry $1 to $250 shipments" (not shown in this report but published in FT 970-I)
3. Arbitrary commodity subgroup code 99 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 99 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 99. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1]The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2]If the number of documents in the sample is greater than 499, the sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

[The commodity group and subgroup figures shown in this table are not comparable with figures for periods prior to 1958 because of certain changes in sampling procedures and presentation for low value shipments. For an explanation of the change in sampling and presentation see explanation of the sampling procedure for estimating low valued imports, 1958 on page 5 of this report]

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 120, November, 1959. Washington 25, D. C. January, 1960.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for Foreign Mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Hawaii and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for instransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countires reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99, includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 99. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups 10, "Leather, rawhide and parchment manufactures;" subgroup 15, "Fodders and feeds, n.e.s.;" subgroup 86, "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and subgroup 90, "Books, maps, pcitures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 99. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 99. For subgroup 99, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 99.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 99 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 99 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Formal entry $1 to $99, and informal entry $1 to $250 shipments" (not shown in this report but published in FT 970-I)
3. Arbitrary commodity subgroup code 99 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 99 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 99. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560

13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1]The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2]If the number of documents in the sample is greater than 499, the sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

[The commodity group and subgroup figures shown in this table are not comparable with figures for periods prior to 1958 because of certain changes in sampling procedures and presentation for low value shipments. For an explanation of the change in sampling and presentation see explanation of the sampling procedure for estimating low valued imports, 1958 on page 5 of this report]

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 120, December, 1959. Washington 25, D. C. February, 1960.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for Foreign Mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Hawaii and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for instransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countires reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99, includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 99. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups 10, "Leather, rawhide and parchment manufactures;" subgroup 15, "Fodders and feeds, n.e.s.;" subgroup 86, "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and subgroup 90, "Books, maps, pcitures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 99. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 99. For subgroup 99, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 99.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 99 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 99 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Formal entry $1 to $99, and informal entry $1 to $250 shipments" (not shown in this report but published in FT 970-I)
3. Arbitrary commodity subgroup code 99 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 99 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 99. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240

40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1]The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2]If the number of documents in the sample is greater than 499, the sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

[The commodity group and subgroup figures shown in this table are not comparable with figures for periods prior to 1958 because of certain changes in sampling procedures and presentation for low value shipments. For an explanation of the change in sampling and presentation see explanation of the sampling procedure for estimating low valued imports, 1958 on page 5 of this report]

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

The statistics in this volume were prepared, under the direction of the Foreign Trade Division, Economic Operations, Machine Tabulation, Electronic Systems and Administrative Service Divisions. The persons contributing most to this publication are listed below:

Foreign Trade Division: Import Branch, Dino S. Villa, Chief; Shirley Dungee, Assistant Chief; Classification and Codes, John R. Anglin; Publications, Emanuel A. Lipscomb; Special Investigations and Regulations, Sadie Bayne. Economic Operations Division: Clerical Processing Branch, Wesley R. Grier, Chief; Procedures Branch, Nathan Lesowitz, Chief; Methods Evaluation and Determination Branch, Samuel Schweid, Chief; Electronic Programming Branch, Jack A. Scharff, Chief; Nathaniel Swersky, Assistant Chief; Directory Branch, Manila C. Ramier, Acting Chief; Foreign Trade Section, Caromel Wooten, Chief; New York Office, Emily H. Laut, Chief. Machine Tabulation Division: Foreign Trade Section, Vincent Greer, Chief. Electronic Systems Division: Programming Section, Dorothy P. Armstrong, Chief. Administrative Service Division: Graphics Branch, Robert H. Brooks, Chief; John F. Lanham, Assistant Chief.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Hawaii and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly and Annual Coverage

In general, the compiling procedures provide for the inclusion of shipments in the statistics for the month of import. However, because of processing problems, there has always been a carry-over of a few percent of shipments from their proper month to a subsequent month, usually the following month. Normally, the amount of carry-over from month to month (and from year to year) remains substantially constant. In March 1958, the amount of carry-over was increased in order to take full advantage of early release dates made possible with the use of electronic equipment for processing import data.

For individual countries and commodity subgroups, the carry-over procedure as a whole may result in the inclusion in the 1959 statistics of some shipments made in 1958 and/or the exclusion from the 1959 statistics of some 1959 shipments which will appear in the 1960 statistics.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance

with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99, includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 99. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups 10, "Leather, rawhide and parchment manufactures;" subgroup 15, "Fodders and feeds, n.e.s.;" subgroup 86, "Scientific and professional instruments, apparatus, and supplies, n.e.c.;" and subgroup 90, "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.

   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 99. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 99. For subgroup 99, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 99.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

For imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Formal entry $1 to $99, and informal entry $1 to $250 shipments" (not shown in this report but published in FT 970-I)
3. Arbitrary commodity subgroup code 99 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States).

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to

which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 99 based upon 75 shipments in the sample would be between $15,855,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using figures for 1958 and later periods for purposes of comparison with figures for periods prior to 1958, account must be taken of the coverage which was in effect for earlier periods, as well as the coverage effective in 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 99. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior periods. The country by subgroup and country by group figures, except group 9, for January 1954 - December 1957 are comparable to periods prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560

14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1]The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2]If the number of documents in the sample is greater than 499, the sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

[The commodity group and subgroup figures shown in this table are not comparable with figures for periods prior to 1958 because of certain changes in sampling procedures and presentation for low value shipments. For an explanation of the change in sampling and presentation see explanation of the sampling procedure for estimating low valued imports, 1958 on page 5 of this report]

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

** Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.
